Futureproof Your City

Innovative Solutions for Smart Cities

Transform the way your local government & citizens operate.

More than 55% of the world's population currently resides in a city or urban area. By 2050, it'll be almost 70%. Growing populations need more broadband, energy, water, transportation, food and entertainment. That unprecedented demand can burden your local infrastructure if you're unprepared.

Transform your community into a connected city with innovative wireless

solutions from Trilogy NextGen. With custom-built networks, you'll have the bandwidth and speed to embrace new technologies that improve your operations while minimizing costs. This will prepare your local government for the future, turning your community into a smart city while satisfying the growing demands of your residents and local businesses.

Affordable, Reliable Internet Access for Everyone

While many companies provide broadband access, only Trilogy NextGen has been transformational in using new technologies to provide internet access, unbiased by socioeconomic status or ZIP code.

By leveraging the connectivity of end-to-end wireless networks, cities and communities can leverage information

and communication to improve community service, citizen well-being and economic development. Studies have shown that smart cities can improve quality of life by up to 30% in critical categories like commute time, personal health and crime prevention.

Studies have shown that smart cities can improve quality of life by up to 30% in key categories like commute time, personal health and crime prevention.

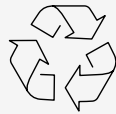

Transform Your City with Trilogy NextGen

Transportation Solutions

Connect your public transportation fleet to move residents safely and efficiently.

Involved Community

Support educational institutions and promote workforce development.

Exciting Experiences

Connect and improve your city's cultural and entertainment districts.

Community Identity

Create a tech-friendly reputation that promotes a positive perception.

Smarter Cities with Better Connectivity

Trilogy NextGen designs, builds and manages high-speed networks that provide superior broadband speed, security, reliability and simplicity for private enterprises, educational institutions, smart cities, industrial plants and government agencies. Building on unique expertise spanning Broadband, Broadcast and Cloud, Trilogy NextGen delivers scalable connectivity solutions customized for any wireless network using Private LTE/5G, Wi-Fi and ATSC 3.0 technologies.

Consumer demand for better coverage and increasing bandwidth leaves many

businesses, municipalities, and academic institutions without the wireless network they need to meet their business needs or prepare for the future. At Trilogy NextGen, we know that when we provide high-speed networks for K-12 schools, higher education institutions, municipalities, and private enterprises, we connect communities to those that matter most. At the same time, this builds community among residents, schools, and businesses that result in greater achievements and economic success.

Fluent in Connectivity

Simplify your network with robust solutions that are reliable across every application and into every corner of your network.
